

Corrections to the Art of Ready Reckoning.

page 127 line 8 from botten. The hyphenation of capacity is strange. I prefer capa-city.

page 128 line 11. The hyphenation of products is strange. I prefer pro-ducts.

page 129 line 7 from botten. I miss the calculation:

After “40000 km!”

With $\pi = \frac{22}{7}$ we may find the radius as

$$\frac{40000}{2\pi} = \frac{70000}{11} = 6363$$

page 131 lines 3-7. I must admit to be out of my mind. Please write:

$$(x \times 10 + 5)^2 = 5^2 + x(x + 1) \times 100,$$

e.g.,

$$25^2 = 25 + 2 \times 3 \times 100 = 625,$$

$$85^2 = 25 + 8 \times 9 \times 100 = 7225,$$

$$125^2 = 25 + 12 \times 13 \times 100 = 15625.$$

page 132 line 13 from botten. It would be clearer, if we add something:

“The numbers are” may be changed to The numbers xy and zw are

Mogens.
